Mohammad Hosein (Cena) Ashoori

Backend / Full-Stack Engineer | Python | FastAPI | Django | React / Next.js | Flutter

Tehran, Iran | cenaashoori@gmail.com | cenaashoori.github.io | github.com/cenaashoori | linkedin.com/in/mhashoori

PROFILE

Backend and full-stack engineer with 5+ years of experience building production web, AI/ML, and mobile products for remote teams. Strong in Python, FastAPI, Django, PostgreSQL, Redis, Celery, AWS, asynchronous services, React/Next.js, and Flutter. Experienced taking product work from early requirements and UX through architecture, implementation, deployment, and operational follow-through.

PROFESSIONAL EXPERIENCE

Senior Backend Developer | Abroadin - Toronto, Canada (Remote) **Jun 2025 - Present**

- Built the Pro Abroadin platform for academic-opportunity discovery, matching users to professors and positions, and configurable online services.
- Implemented crawlers and data pipelines that collect, normalize, and structure academic positions, programs, and related web data.
- Designed configurable contract and service workflows, plus email-tracking and CV-generation dashboards with queued jobs for scheduled emails and document generation.
- Developed an AI-assisted WordPress plugin, automated consultation workflows, and customized the company CRM using Django, PostgreSQL, Redis, Celery, async Python, React, and WordPress.

Backend & ML Developer | Serana AI - Vancouver, Canada (Remote) **Mar 2025 - Jun 2025**

- Built FastAPI microservices for PyTorch training jobs, model versioning, S3 artifact storage, and prediction serving; used Redis for task queuing and delivered a reusable Python client package.

Backend Developer | AiBrary - Vancouver, Canada (Remote) **Oct 2024 - Jun 2025**

- Developed FastAPI/Python services and AI-enabled features, including LLM workflows, database work, OpenWebUI maintenance, documentation, and prototypes.

Full-Stack Developer | Fast Learning App - Montreal, Canada (Remote) **Feb 2021 - Dec 2023**

- Built cross-platform Flutter mobile features and Django backend services across API contracts, product workflows, debugging, and iterative delivery.

EDUCATION AND RESEARCH

B.Sc. Computer Engineering | Vali-e-Asr University of Rafsanjan - Rafsanjan, Iran **2018 - 2022**

Software Engineering focus | CGPA 16.34/20 (3.47/4) | ranked 6th in the 2018 Computer Engineering cohort

Research assistantship in community detection and software engineering; teaching assistant for AI, Databases, Data Structures, Algorithms, Discrete Mathematics, and Programming.

SELECTED PUBLICATIONS

Refactoring Detection Across Languages: Leveraging Java-Trained Models for Detecting Class-Level Refactorings in Kotlin - SEAA, 2026. DOI: 10.1007/978-3-032-04190-6_4

Community Detection Method Based on Random Walk and Multi-Objective Evolutionary Algorithm in Complex Networks - Journal of Network and Computer Applications, 2025. DOI: 10.1016/j.jnca.2024.104070

SELECTED PRODUCT ENGINEERING

Product Engineer | DocSphere - Healthcare platform — **Selected project**

- Built a multilingual healthcare platform from initial product design through production, using Next.js/React and FastAPI across structured intake, specialist discovery, consultation, prescription, and patient-context workflows.
- Developed scheduling and care workflows for availability, appointments, reminders, consultation coordination, patient history, and AI-assisted visit preparation.
- Implemented AI-assisted care navigation, symptom capture, and consultation summaries to help prepare visits without replacing clinician decisions.

Product Engineer | Wearto - Fashion and commerce — **Selected project**

- Building an AI-assisted fashion product across Flutter mobile, FastAPI backend, and React/Next.js web.
- Developing digital wardrobe, saved-look, and weather-aware outfit-discovery workflows.

Product Engineering | Chaty, TIC8, Bitpin, and WordPress — **Selected projects**

- Chaty: FastAPI/Next.js/WebSocket platform with PostgreSQL, Redis, role-based access, RTL/LTR support, and commerce and messaging integrations.
- TIC8 and Bitpin: product work across travel discovery, provider boundaries, market-data integrations, forecasting, and notification workflows.
- WordPress: custom plugins, WooCommerce extensions, REST integrations, admin tools, scheduled jobs, and payment-safe workflows.

TECHNICAL SKILLS

Languages: Python, Dart, JavaScript/TypeScript, PHP, SQL, C/C++, Java, R, MATLAB

Backend: FastAPI, Django/DRF, async Python, REST APIs, WebSockets, Celery, Redis, PostgreSQL, MySQL, SQLAlchemy, Alembic, JWT/OAuth, pytest

Web and mobile: React, Next.js, Flutter, MUI, Tailwind CSS, Vite, responsive and RTL/LTR interfaces

Cloud and delivery: AWS S3, RDS, Lightsail, Lambda, SQS, IAM, Docker, Linux, Git, CI/CD, monitoring and operational debugging

AI/ML and integrations: PyTorch, TensorFlow, scikit-learn, AutoGluon, pandas, NumPy, OpenCV, LLM APIs, RAG workflows, WordPress, WooCommerce, Telegram, n8n

Engineering workflow: Experienced with multiple AI coding-agent harnesses across product engineering work

Languages: Persian (native), English (fluent)
